

GEORGETOWN COMMUNITY PARK & GARDENS

This new concept for Georgetown Century Park envisions a space where the community can play, connect, and share. PLAY space is included in the upgraded basketball court, the lookout play gardens, and paths, the asphalt games area, and the amphitheater. Many of these features utilize the slope of the site to create interactive, multi-purpose, natural play areas. Opportunities to SHARE are fostered through the storytelling circle, community gardens, and the earthwork amphitheater. These spaces could be used for the community to gather and CONNECT, whether it is by getting involved with the gardens, swapping stories, sharing a picnic, or a talent in the amphitheater. The park will provide opportunities for future development, and a wide array of uses for the community to enjoy.
